

# IMAGENE PRECISION MEDICINE SUMMIT, SEPTEMBER 6, 2024

*“Pharmacogenomics: State of the Art, 2024”*

## CALL FOR RESEARCH POSTER SUBMISSIONS

***Attendees at any level are invited to submit an abstract for a research poster presentation at our Annual Precision Medicine Summit, to be held September 6, 2024, at the Sanford Center in Sioux Falls.*** There is no mandatory poster format. Posters will be uploaded to our Summit website with the presenter's name, institution, and email address prior to the meeting. Along with the poster, presenters are encouraged (but not required) to also submit a 3–5-minute video, providing a brief summary of their data that will also be uploaded onto the website. The purpose of the video is to walk attendees through the contents of the poster as it will be presented live at the Summit. Posters selected for presentation must be mounted on the boards provided by 7:30am the day of the meeting and must remain up throughout the Summit (until 5:00pm).

Presenters should submit their posters (pdf files) and videos (mp4 files) by filling out the poster application in Smartsheet by **September 1, 2024**. Link below:

<https://app.smartsheet.com/b/form/a53dbfd82cbc40c4866430878acbb8f>

Please name your files with your first and last name so that the files are easily identified. In order to make the posters available to attendees to view, late poster submissions will not be accepted.

You will be asked on the application to select one of the following **sections** for your poster:

- **Imagenetics** (includes programmatic areas that intersect with the Imagenetics initiative)
- **Genetic Counseling**
- **Genetics/Genomics Research** (includes research in areas such as translational research, public health, animal models of human genetic disease, and clinical research)
- **Pharmacogenomics**
- **Rare Disease Research** (includes rare disease research in areas such as translational research, human health and disease, animal models of disease, and clinical research)
- **Other Topics Related to Precision Medicine**

We have scheduled a formal poster session during the summit (from 12:30-1pm), during which time attendees will be able to ask questions of the presenters and discuss relevant research findings and implications for future investigation. Presenters are required to be at their posters during that time.
